Environmental Site Assessment Training Courses

Phase 1 ESA's for Upstream Oil & Gas Wellsites

This asynchronous online course is exclusive to the Upstream Oil and Gas sector and designed to educate Environmental Consultants, Wellsite operators, and Individuals looking to enter the Oil & Gas industry, step-by-step the mandatory procedures for conducting a Phase 1 ESA for the purpose of reclaiming Oil and Gas Wellsites and Facilities.

This 7-hour*, online training course allows attendees to learn at their own pace by utilizing recorded video lessons, power-point presentations, website demonstrations, and interactive assignments and quizzes. This course counts as "ESA related course" towards AESAC's CESA and CESAll designations.

Course Instructor:

Jennifer Fletcher, B.Sc. P.Ag. RESA

Jennifer has over 18 years experience in the Environmental Industry throughout Alberta, BC and Sask. She is currently Lead of Reclamation & Remediation–Environmental Operations at H3M Environmental.

Course Costs:

\$499.00: includes: Step-by-step course manual, resource and reference materials, course completion certificate. (Digital Course materials only)

\$549.00: Includes hard copy of all course materials. Shipping included.

Save \$200 if also attending AESAC's Phase 1 and/or Phase 2 Certification courses.

*Attendees are granted access to AESAC's online training portal for 30 days to complete this course.
